CSC – Suomalainen tutkimuksen, koulutuksen, kulttuurin ja julkishallinnon ICT-osaamiskeskus

MENTI.COM

Reilu tutkimusaineisto

F

FINDABLE

- Selkeät metatiedot aineistokatalogissa
- Kuvailusivu, jolla ainutkertainen pysyvä tunniste

A

ACCESSIBLE

- Ladattavissa verkossa
- Versiot ja elinkaari dokumentoitu
- Muistosivu poistetulle aineistolle

I

INTEROPERABLE

- Yhteiset, dokumentoidut ja avoimet formaatit

R

RE-USABLE

- Ymmärrettävä ja riittävästi kuvailtu
- Käyttöehdot selkeästi esillä

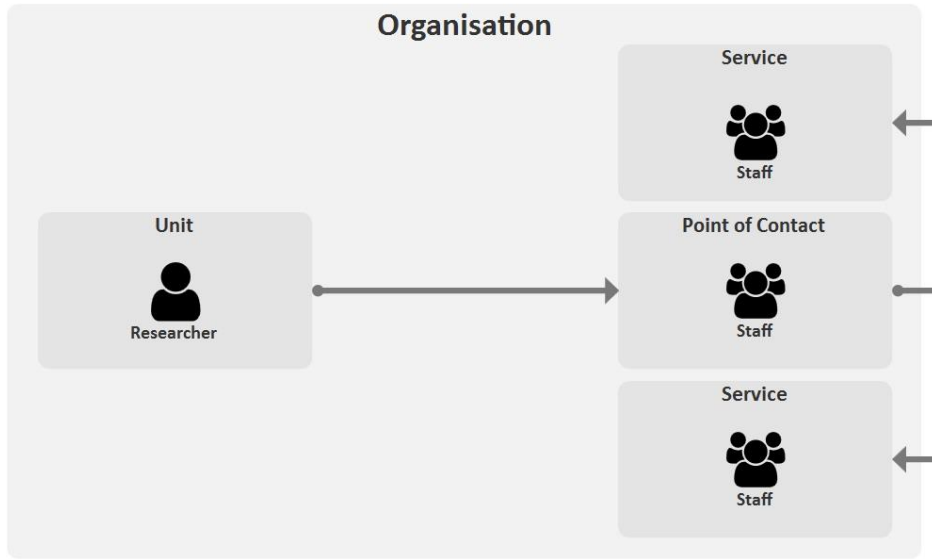

Survey

- 37 respondents from 25 institutions:
 - Ranging from pioneers in RDM to institutions that are just beginning to organize RDM support

Type of institution	Number of replies	Number of institutions
Universities	22	12
UAS	3	3
Research Institutes	8	7

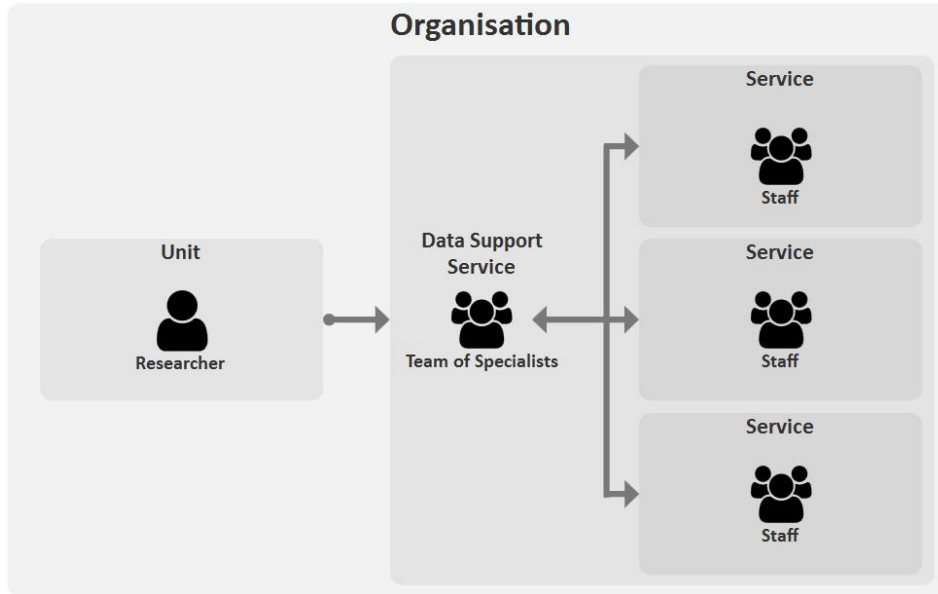

Others:
 Unspecified (1)
 Funding body (1)
 Data service provider (2 replies / 1 institution)

RDM Service models: A. Network of services

- Point of contact for the researcher: often a service desk e-mail address run by the library
- The point of contact is responsible for getting in touch with other relevant services to find solutions
- Services commonly involved in the network:
 - IT services
 - Legal services
 - Communications office
 - Research and Development / Innovation Services
 - Funding experts
 - Archive
- In specific cases: Data protection officer, Open Science project manager, collaborators from the faculties/departments

RDM Service models: B. The “One stop shop” model

- Experts from the relevant services are grouped into a Data Support Service unit
- The same services as those involved in the network model, e.g. IT, Legal services, Funding experts...
- Difference: Clear roles and commitment, more seamless cooperation
- Single access point for the researcher
- Cooperation with other services if necessary (e.g. the archive)

RDM Service models: C. Embedded services

- Institution-level Research Services + services embedded in the units (e.g. faculties)
- Aim: to provide a combination of general and discipline specific support
- Discipline specific support provided in cooperation of
 - Researchers trained as data specialists ("data agents")
 - Experts from the research support services trained to understand the specifics of a certain unit, e.g. a faculty.
- Disadvantage: multiple points of contact, various services, not easy to figure out who to contact with a specific problem.

Toivottuja palveluita aineistohallinnan tukeen

- Webinaarit 31
- Ohjeet, muistilistat tutkijoille 28
- Koulutusmateriaalit 26
- Koulutukset 25
- Seminaarit/työpajat 20
- CSC asiantuntijavierailut organisaatioissa 18
- Avoin keskustelufoorumi asiantuntijoille 14
- Tapahtumaformaatti 13
