What is sensitive? Baby don't hurt me

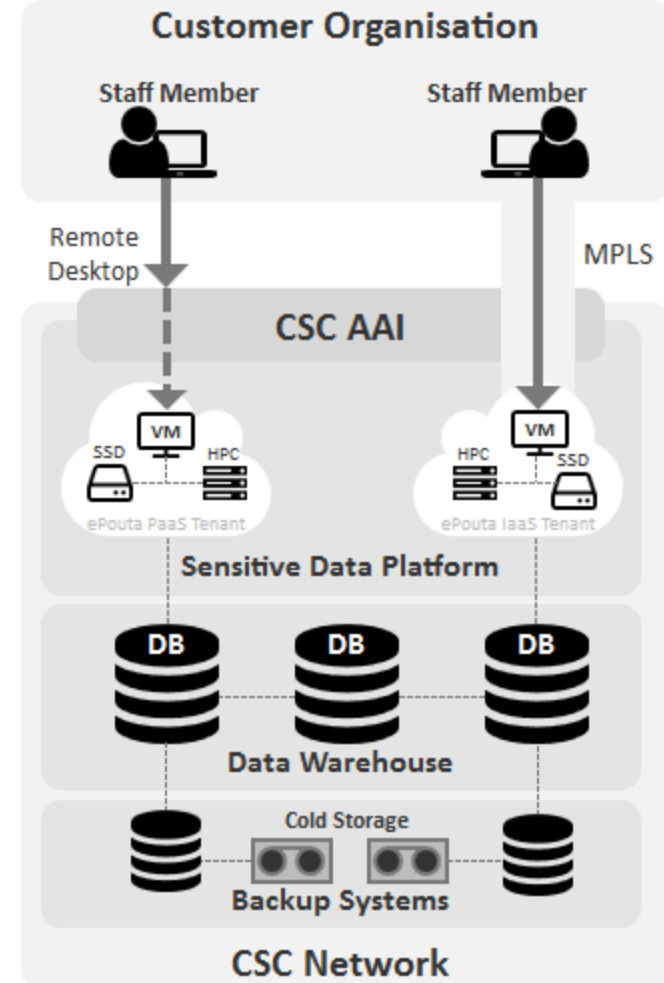

- Sensitive data is defined as any information that is protected against unwarranted disclosure.
- Protection of data may be required for legal or ethical reasons, for issues pertaining to personal privacy, or for proprietary considerations.

What's law got do with it

- General Data Protection Act & Data Protection Act, ([1050/2018](#))
- Laki julkisen hallinnon tiedonhallinnasta ([906/2019](#))
- Act on the status and Rights of Patients ([785/1992](#))
- Biobank Act ([688/2012](#))
- Act on the Openness of Government Activities ([621/1999](#))
- Tilastolaki ([280/2004](#))
- Arkistolaki ([831/1994](#))

- ePouta Remote Desktop
- Sensitive Data Management Platform
 - Secure submission
 - Secure storage
 - Controlled access

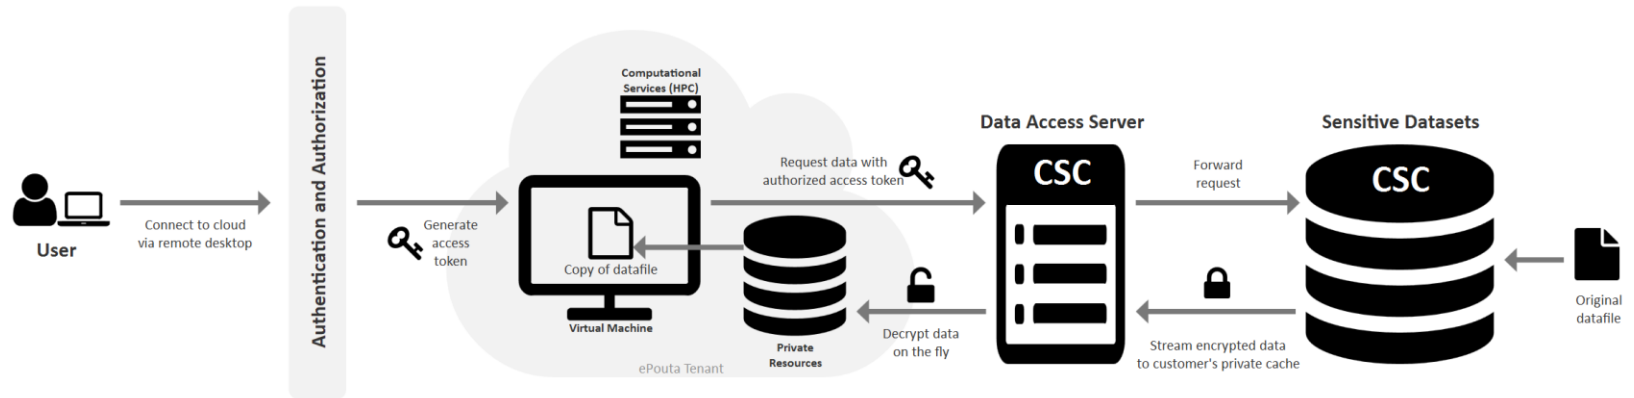

Private investigations

- ePouta is a virtual private cloud.
- Your network, your firewalls, your software, your admin skills; you are in charge.

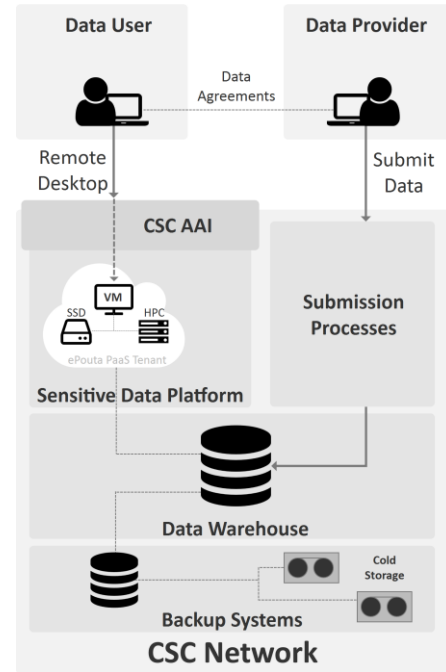

The man pushing buttons on remote control

- ePouta Remote Desktop provides a web browser user-interface to private ePouta virtual machines.

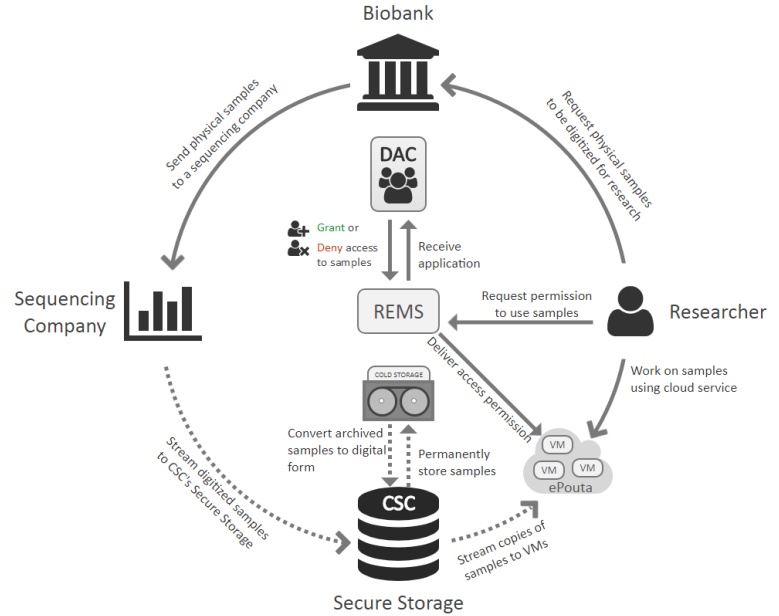

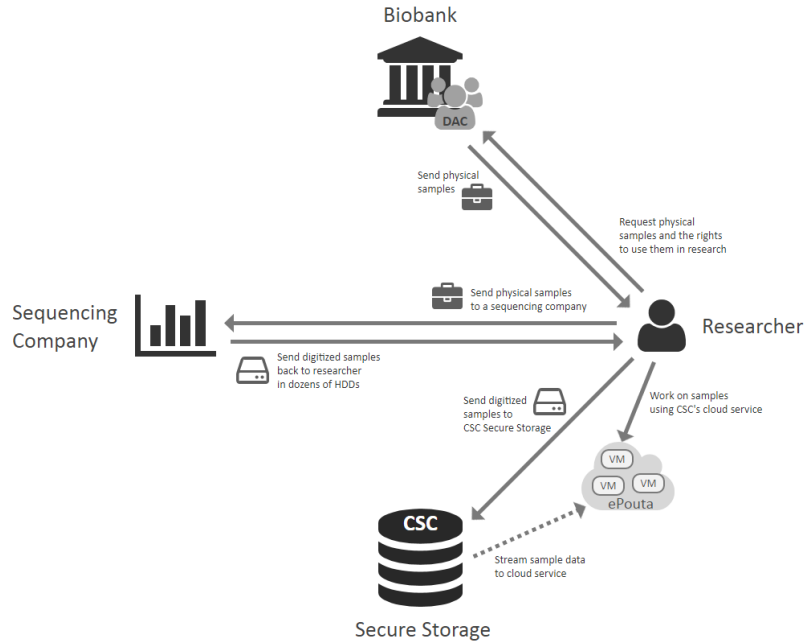

Submission going down down

- The new Sensitive Data Management Platform adds a service layer between the storage and the user applications.
 - It takes care of encryption and decryption of data.
 - It ensures that the secured data is visible and accessible for only those users who have been granted to access it.
- The processing environment, access mechanism and the sensitive data storage are all logically and physically separated from each other in order to ensure maximum security.
